Personal summary

I am a frontend engineer seeking an entry-level position at a company. I have a strong desire to participate and contribute to a team within the company to produce web applications that meet industry standards, using my coding skills, and delivering them on time.

Experience

PUI – PT.DLI | Malang, Indonesia

February 2023 – July 2023

- Develop frontend code using the React framework that aligns with the UI/UX design.
- Collaborate with the UI/UX and backend teams using the agile method to complete the web application.
- Participate in code reviews to ensure the code meets industry standards and perform bug fixing.

Pemerintahan Kota Malang | Malang, Indonesia

September 2022 – October 2022

- Created documentation for several community activities attended by 50 - 60 participants.
- Assisted in handling online services and maintenance service content.
- Built an app for a feedback service survey using React Native.

Education

Ruangguru (kampus merdeka)| Jakarta, Indonesia

February 2022 – July 2022

- Complete 2 to 4 exercises daily on HTML, CSS, JavaScript, and React based on projects.
- Learn best practices for using the React framework according to industry standards.
- Use management tools to collaborate with the team using GitHub.
